

VOL. 3 | SEPTEMBER 2021

THE TSA TIMES

Edited by your State Officer Team: Shreya Jayaram, Carson Schmitt, Parker Foy, Brooke Slone, Mallory Peavey, Zoe Coffey, Shreyashi Dutta

CORE 2021: YOUR LEADERSHIP X-PERIENCE

This year at CORE, you had the opportunity to follow your path and unlock your leadership X-perience.

Through several sessions, you were provided with the skills needed to sail your ship back home. You were taught take-it-home activities to bring your chapter together and were taught by your own State Officer team about how to lead your crew back home to success this year. You were given resources to utilize, as well as experiences that you will never forget. The entire team hopes you enjoyed your weekend and took away many amazing things to help you have a smooth sailing ship this year.

Turn on notifications for our YouTube channel, "Georgia TSA", to be the first to see our upcoming CORE Recap!

President's Corner

Hey guys! It is your 2nd Vice President Parker here! I hope you had an excellent time at CORE! I hope that you learned a lot about leadership during your time there. I'm so excited for Tech Day. It's going to be an excellent return to competitions and a great start to the year overall. Good luck to all!

Pool Party

Hi Georgia TSA! My name is Zoe Coffey, and I'm serving as your State Reporter. This past year was so full of unknowns, so returning to normalcy seems exciting yet challenging. As your chapter returns to in-person meetings and events, be sure to stay safe and HAVE FUN! I'm BEYOND excited for Tech Day, and I hope to see everyone there! Until then, make sure to stay updated through our Instagram (@georgiatsa) and YouTube channel ("Georgia TSA"). We revived the Sunday Sit-down series, started this monthly newsletter series, and launched a Member of the Month program (all of which you can keep up with through our social media)!

Hispanic Heritage Month

Hispanic Heritage Month starts on September 15th and ends on October 15th. This month recognizes and celebrates American citizens whose ancestors are from Central and South America. We will be highlighting some important scientists and engineers. Luis Alvarez was a physicist who won the 1968 Nobel Prize in Physics. He developed multiple radar systems and worked on the Manhattan Project. Another scientist, Franklin Chang-Diaz, was the first Hispanic NASA astronaut and was involved in seven space shuttle missions. Lastly, Carlos Juan Finlay was an epidemiologist who discovered that yellow fever was transmitted by mosquitos. We hope you take the time to recognize their achievements.

Upcoming Events

Our second event of the year is quickly approaching! Tech Day is set for Monday, October 11th at the Georgia National Fairgrounds in Perry. We hope to see you there! TSA Week (October 11th - 15th) directly follows Tech Day. Finally, Fall Leadership registration closes on October 15th.

Congratulations Kylie!

Fill out our Member of the Month nomination form (linked in our Instagram bio) to nominate yourself or another member for October Member of the Month.

What is Technology Day?

Georgia TSA's Technology Day, or Tech Day, is a one-day trip where members have the opportunity to participate in a small variation of competitive events, ranging from Pin Design to a Robotics Challenge. It is held every year in Perry, GA at the Georgia National Fairgrounds. Following the competitive events and general session, members are encouraged to explore the fair with their chapter and have fun riding rides, eating food, and more!
