

Emory SPARC is thrilled to partner with Georgia Technology Student Association to host a groundbreaking Virtual Reality Design Competition! This unique challenge invites participating GATSA middle and high school members to create health-focused VR games that promote fitness and wellness through innovative gameplay. Do you have what it takes to design the future of health technology?

MUST Apply by: February 5

We can't wait to see what YOU bring to the table!

Georgia TSA is working with Emory University's SPARC to provide an awesome competitive opportunity for your students.

Please see the message below.

Attached are the rules for the VR Game Development Competition.

We're thrilled to announce a new VR Game Development Competition sponsored by Emory University's Sports Performance And Research Center (SPARC)! This is an incredible opportunity for students to engage in innovative game development using VR technology while promoting health and wellness. Notably, SPARC is offering to donate 2 VR headsets to each of the 20 selected teams. Details are outlined in the attached competition documents.

To get started, please have your students read through all of the attached materials and complete the application form attached to this email. The application deadline is **February 5th, 2025** and applications are now officially open! Please encourage your students to submit their application as **quickly as possible**. Applications must be sent to sparc_gives@emory.edu before the application deadline.

We can't wait to see the creativity and innovation your students bring to this competition! If you have any questions or need further assistance, feel free to reach out to Emma Veiga at eveiga@emory.edu.

Thank you in advance for taking part in this exciting opportunity!
